

# Razvan Lungeanu

## Computer Science Student

Motivated and dedicated Computer Science student seeking an opportunity to contribute my skills and knowledge in a professional environment. I am eager to apply my theoretical understanding gained through coursework and practical experience to make a positive impact on real-world projects. With a strong foundation in programming languages and problem-solving, I aim to secure a position where I can learn and grow while actively contributing to a dynamic team.

## Experience

### 2018-2021

People to People Vaslui

### Volunteer

During my time volunteering at an association, I had the opportunity to contribute my skills and efforts towards a worthy cause. The association focused on empowering underprivileged people through community initiatives

## Projects

### Pirates Hide and Seek

Implementation of the Pirates Hide and Seek board game in C++ using the graphics.h library. There is a demonstration video of the application on my GitHub.

### Hospital Planner

Hospital Planner application that facilitates the creation of appointments both for doctors and for patients. Application made using Flutter and Java Spring

### MoX

Netflix-like platform that allows the user to get the latest information about a movie, their actors, their statistics and many more. Website created using HTML, CSS, Typescript, Node.js.
